This individual whom I so clearly remember (this was the first conference I had ever attended) was NOT the organizer of the event, but he claimed to be the leader of the Third Decade group in Chicago, and he handled my admittance money, so I mistakenly assumed him to be one of the organizers.

This was not a reference to the actual organizers , but to one of those many shadowy figures who hovered around and who continue to plague the search for truth.

I remember he was a thin, very tall and blond man, perhaps balding, sort of Nazi-Nordic looking, with glasses. My tickets were messed up (as

.sual), and he handled the matter, so I wrongly assumed him to be the organizer. Sorry about any mistaken representation made above!! He did say he was a believer in the Warren Report, and he said it quite seriously.

This was the beginning of my latter day education in the slippery disinformation-spy game that surrounds so many stories of vital importance to the "Real History" (as Lisa Pease calls it) of the JFK assassination, and to many other pivotal events of our times.

I have heard so much high praise for "Assassination Science". I look forward to those days when I can sit and read it. So many books yet to read. So much information available on the shelves and in the pages recorded by researchers, and so few trumpets for truth.

We must be trumpets for truth. That is how I understand life.

Again, I deeply apologize for any misrepresentation regarding that Chicago conference. I certainly apologize to the actual organizers for my hasty asumption.
